**AZALEA GLEN
NURSERIES, INC.**

LOXLEY, ALA.

Conveniently Located On Principal
Highways, Intersection of U. S. 90
(Old Spanish Trail) And Alabama
No. 3

17 Miles East of Mobile

**SEASON
1940-1941**

GREETINGS:

To Our Friends and Patrons:

Please accept our sincere thanks for every order with which you have favored us in past seasons. In expressing our sincere appreciation, we say our aim toward successful operation is to merit your continued good will. With this in mind we are bending every effort to produce better quality nursery stock at prices you can afford to pay.

We are of the opinion that a home is not complete until it is "Planted" and naturally will take great pleasure in offering you our assistance in every way possible to bring about this acquisition to your home grounds.

From the many letters of praise for our stock, from our patrons this past season we feel satisfied that we can merit your future patronage.

WE GUARANTEE: Our stock to be grown true to name and properly packed : We cannot control condition after plants leave us, making it impossible for us to guarantee plants to live.

Our responsibility for delivery ceases when we have delivered the stock in good condition to the transportation company or carrier. Any claims should be made within five days of receipt of stock. It must be agreed that our liability under this guarantee is limited to the original price received for stock.

TERMS: All orders must be accompanied by cash: Add 2% Sales Tax to all orders for delivery within the State of Alabama.

TRANSPORTATION: State whether order is to be shipped by parcel post, express or freight.

Prices subject to change without notice.

Visitors always welcome.

M. M. WINDBIGLER, President

Cultural Information

for growing better Camellias and Azaleas.

The first main item is the stock that you buy to plant. If you buy shade house grown stock that is not used to full sun and has been grown in a crowded condition, you cannot expect to have them grow off and make you nice plants and give you the flowers that you expect. When you buy always ask for and get plants that are growing in full sun in the fields. They are more sturdy and will transplant and grow as you want them to.

Next you must have the place where you are to plant the new plants ready and in proper condition. If in a sandy soil take out the sand down to two feet and refill with fresh pond muck, add well rotted dairy fertilizer, peat moss; this makes a mixture that will feed your plants and will retain the moisture during the hot dry weather in summer. If you use cotton seed meal be sure and use the hose and wet as it will burn the plants, and is sure to if used in sandy soils and no water used. Vigoro may be used in the spring, but plants must be well watered whenever commercial fertilizer is used. Never use a fertilizer that contains lime as it sweetens the soil, and these plants thrive in acid soil. If you have alkaline soil, then use Aluminum Sulphate at the rate of four-inch pot full to a wheel barrow of soil.

If you cannot water the plants the first season that they are planted then they should be shaded until late fall. Mulch them well with peat moss; that helps hold the moisture and keeps down the weeds.

Azaleas and Camellias will grow and give you all the flowers that you expect growing in full sun. Keep them away from other large plants that are gross feeders and will steal the food and moisture that you give your new plants.

Insects And Diseases

Red Spiders attack both Azaleas and Camellias. It is apparent by dropping of many leaves from the Azaleas; the Camellia leaves become brown in color. On Azaleas you can use the hose and wash them off. If this does not control them, use the following dust measure: Mixture, eight pounds sulphur, one pound arsenate of lead, one pound tobacco dust. Dust on early in the morning while the dew is on. Be sure and dust the under side of the leaves.

Camellias are attacked by several species of scale insects. You can tell when your Camellia has scale by the leaves becoming spotted and yellow, caused by scale on the under side of the leaves. They should be sprayed by Nursery Volk, Jr., one part to 50 parts of water. If the infestation is heavy they ought to be sprayed three times a year during the early spring and summer. Be sure and spray the under side of the leaves as that is where you will find the scale. Warning: DO NOT SPRAY Camellias in late fall or winter as a sudden cold weather

just after spraying may kill your plants, or cause buds to drop.

Remember, buy good plants, place in well prepared beds, spray when needed, mulch with peat moss, and you will have shrubs of which to be proud.

Azaleas can be transplanted any time of the year. However, the best time is from the first of September through March. Camellias can be transplanted from the latter part of September until growth starts in spring.

Any special problem that you may have in regard to your plants, send us a card and we will be glad to help you.

Camellia Japonica

This is king of our broad-leaved evergreens. You may have these beautiful flowers from September through into March, in so many colors and from singles to large heavy doubles. They make fine tub and pot plants. We are offering 90 varieties this season, 40 more than last year, and have many more, some very fine seedling that will be offered next year. Some camellias are selling under several different names, in order that you may not buy the same camellia under two different names we are listing ours under the standard names and also giving you their scientific names. Will be very glad to help you make your selection. Visit our nurseries, we will show you as fine camellia plants that can be grown. You will like our stock of; Glen No. 40: Blood of China: Nagasaki: Mathotiana Rubra: Order Early then you will not be disappointed.

Class

- A ALBO PLENO: White, double, early blcomer.
- Rare APPLE BLOSSOM: Light pink, single, quite fragrant, fast grower.
- A-1 AUGUSTA DELFOSSE: Cherry red, loose peony form.

- A-1 BRILLIANT: Bright red, double, blooms midseason, good grower.
- Rare BLACK PRINCE: Black red, double, late blooming, fast grower.
- Rare BLOOD OF CHINA: (Victor Emanuel) Deep Red, peony form, large flowers, mid-season bloomer, good grower.
- A BONAMIANA: Variegated, flowers, you will also find solid colors of red and white flowers on the same bush, semi-double, good grower.
- Rare BURNS PINK: (Angelo Cochet) White spotted with pink, large peony form, late season bloomer, slow spreading grower.
- A CHANDLERII: (Pride of the Emperor Garden) Cherry red with white, large peony form, mid-season bloomer, fair grower.
- Rare COLLETTIE MACULATA: Red striped with white, peony form, late bloomer, slow grower.
- A-1 CONCORDIA: Pink and white, peony form, fast grower.
- A COUNTESS OF ORKNEY: White with pink stripes: double, slow grower.
- Rare C. M. HOVEY: Red, variegated with white, very much like Mathotiana Rubra, except the white markings.
- A CAMEO PINK: Semi-double with stamens, pink, mid-season bloomer, good grower.
- A-1 CARNATION: (Christmas Glory) Bright red, double, mid-season bloomer.
- Rare CANDIDA ELEGANTISSIMA: Deep pink blotched with white, semi-double, large flowers, mid-season bloomer, good grower.
- Rare COL. FIREY: (Wm. S. Hastie) Rich crimson, double, large flowers, late bloomer, good grower.
- A-1 CHEERFUL: (Lucida) Red, double, showing stamens, mid-season bloomer, tall upright grower.
- Rare DEBUTANTE: (Sara C. Hastie) Light Pink, peony form, early bloomer, slow grower.
- Rare DUCHESS OF SUTHERLAND: White with occasional red splotch or stripe, semi-double, very large, mid-season bloomer, good grower.
- B DIXIE: (Fielders Pink: Rosita: Pink cheerful:) Rose pink, double, good grower, mid-season bloomer.
- Rare DAIKAGUARA: Pink, peony form, large flower, very early bloomer, good grower.
- Rare DAIKAGUARA VARIEGATED: Same as above except flowers variegated.
- Rare DANTE: White, double, medium size flowers, good grower.
- Rare DONKILARI: (From California), Red blotched with white, semi-double, good grower.
- Rare DONKILARI: (Georgia) Red with white markings, semi-double, very large flowers, late bloomer, slow grower.
- Rare EMPRESS: (Lady Clare, Grandiflora Rosea) Deep pink, semi-double, early bloomer, very large flowers, good grower.

- A-1 ELLANOR McKENSIE: Pink with white markings, peony form, mid-season bloomer, good grower.
- Rare EMPEROR OF RUSSIA: (Pride of Greenville, Hendersonii), Brilliant red, large peony form, fair grower.
- A ENRICO BETTONI: (Maurice Hurst, Haleys Monarch), light pink, semi-double to peony form, late bloomer, fast grower.
- Rare FAIRHOPE: (Two Story House): Three in One: Red and white variegated, semi-double, petals like crinkled crepe paper, mid-season bloomer, fair grower.
- A FLORIDA: Pink and white variegated, double, mid-season bloomer, good grower.
- Rare GLEN NO. 40: Beautiful Red shading into salmon, semi-double to double, late bloomer, and a slow grower. This of all the varieties of camellias we have, open up 100% during the past cold winter, it is the finest camellia we grow.
- Rare GIGANTEA: (Magnolia King Kellingtonia), Deep red, semi-double stripe and marbled with white, late bloomer, open grower.
- A-1 GLORIE DE NANTES: (Leana Superba), Cerise Red, semi-double, large flowers, center petals often twisting, good grower, mid-season bloomer.
- Rare GOVERNOR MOUTON: Deep red, some times marbled white, peony form, late bloomer, medium grower.
- Rare GOGHOGURUMA: Deep red, semi-double, good size flowers, mid-season, bloomer, good grower.
- A HERME: (Hikari Gengi, Jordans Pride, Jenny Lind), Variegated white, with red and pink stripes, large loose semi-double to peony form, good grower.
- A-1 HORKAN: (Rena Campbell, Variabilis), pink and white combination with some solid colors on same plant, peony form, good grower.
- Rare ILL TRAMENTO: (Laurel Leaf: Countess Lovinia Maggi), white with pink shading, petals incurved in center, double, medium grower, mid-season bloomer.
- B JARVIS RED: Deep blood red: large semi-double, good grower, mid-season bloomer.
- Rare KIYOSU: Crimson blotches on white ground, very large flowers, medium grower.
- Rare KUMASAKA: (Lady Marion), deep pink, large peony form, fair grower, late season bloomer.
- A LADY ALICE: Dark red, with some white, peony form, good grower, late bloomer.
- Rare LADY VANSETTIE: Semi-double red with some white, semi-double, mid-season bloomer, fair grower.
- Rare LADY BLUSH: Delicate flesh pink, double, slow grower, mid-season bloomer.
- Rare LELIA: Shell Pink, often with white markings, double, mid-season bloomer.
- Rare LEONA BOLEN: Blood red, large semi-double, fair grower, mid-season bloomer. This is a new seedling.

- Rare LADY MULBERRY: Beautiful shade of pink, with flowers frosted with white on each petal, large, semi-double, fair grower, mid-season bloomer.
- Rare MARCHIONESS OF SALISBURY: Dark red, sometimes the flowers will have blotches of white, peony form, mid-season to late bloomer, fair grower.
- Rare MADAME NIHART: (Fanny Bolis), Red blotched with white, large, semi-double, mid-season bloomer, good grower.
- Rare MISS DORA McCARTER: White, large single, fair grower, mid-season bloomer.
- Rare MONARCH: (Red ball: Gunelli: Honneur d' Aerique), Deep pink to light red, with some white markings, very large peony form, mid-season on to late bloomer, slow flat grower.
- B MON LOUIS PINK: Light pink, semi-double good grower, mid-season bloomer.
- Rare MRS. WILLIAM THOMPSON: White, large semi-double, recent importation from Europe, good grower, mid-season bloomer.
- Rare MATHOTIANA RUBRA: (Purple Emperor: Purple Dawn: William S. Hastie), light red to deep red, depending on the soil conditions, very large double, sometime showing stamens, as the flowers get older, outer edge of petals turn purple. Good grower, mid-season bloomer.
- A MME DE STREAKALOFF: (Gen Lamcriere: Punctata Major), pink and white, semi-double, to peony form, good upright grower, late bloomer.
- A MATHOTIANA ALBA: White, large full double, some flowers have markings of red fast grower, late bloomer.
- A MEIGS VARIEGATED: Light rose pink, often splotted with white, large double, fast grower, late flowering.
- A MRS. ABBY WILDER: White, with tiny splashes of pink, peony form, compact, good grower, mid-season bloomer.
- Rare MADAME ADELE: Large pink, peony form, good grower, had flowers from the first of the camellia season and was the last to bloom for us. Good grower.
- A NOBLISSIMA: Creamy white, semi-double, interspersed with golden stamens, good grower, mid-season bloomer.
- Rare NAGASAKI: Very large, white, marked with red and pink markings, semi-double, fair upright grower, mid-season to late bloomer.
- A-1 NATCHEZ: Large red, some flowers have white spots, fair grower, mid-season bloomer.
- A-1 OTOME: Shell pink, larger flowers than pink perfection, double, mid-season bloomer.
- Rare POWELL'S PINK: Large pink, peony type, slow grower, mid-season bloomer.
- A-1 PINK PERFECTION: Light pink, double, good grower, early bloomer, one of the best for pot culture.
- A PROF. C. S. SARGENT: Dark red, this is one of the finest red camellias, double, mid-season bloomer, good upright grower.

- Rare PEONIAFLORA: White with pink blotches, very large, peony to semi-double form, good grower, mid-season bloomer.
- Rare PURPLIANA: White with red and pink markings, peony form, dark green round leaves, flat, slow grower, mid-season bloomer.
- A PRNCE EUGENE NAPOLEON: (Pope Pius: Ladnier's red), bright red, double, sometimes spotted with white, fast, upright grower, early bloomer.
- A RUBRA VIRGINALIS: Salmon pink, peony form, mid-season bloomer, good grower.
- Rare RED CHANDLERII: (Paynes Red), beautiful shade of red, peony form, mid-season bloomer, fair grower.
- A RAINY SUN: Dark red, semi-double, mid-season bloomer, fast upright grower.
- B ROSE EMRY: Crimson, peony form, good grower, early bloomer.
- Rare RED EAGLE: Pink, very large semi-double, good grower, mid-season bloomer.
- Rare ST. ELMO: (Augusta Wilson, Cabbage Head) Beautiful shade of soft pink, very large peony form, some flowers will have white markings, fair grower, early bloomer.

- A WARRATA RED: Deep shade of red, peony form, fair grower, mid-season bloomer.
- Rare WARRATA WHITE: White, peony form, fair grower, mid-season bloomer.
- A-1 YARD PINK: Deep pink, peony form, fair grower, mid-season bloomer.

Camellia Sassanqua

- BRILLIANCY—Bright cherry red, 18 in.\$2.00
- DAWN—Flowers semi-double, ivory white with flesh pink at the margin of the petals, 18 in. \$2.00

OLEANDER—The long narrow green leaves with the bright colored flowers makes it a shrub that will fit into any planting. The Oleander is a most desirable plant for sea-side planting; stands the salt atmosphere.

Cardinal (Deep Red) Mme. Peyre (Shell Pink) White Medium ---\$.40 Large ---\$.65 Specimens ---\$1.00

PITTOSPORUM TOBIRA—A shrub with glossy dark green leaves. Fragrant yellowish-white flowers. Makes a beautiful specimen plant. Fine for hedges.

10-12 in. ---\$.50 15-18 in. ---\$1.00 24-30 in. ---\$1.50

PITTOSPORUM VARIEGATED—Same as above except slower grower and has variegated foliage.

8 to 10 in. ---\$.50 15 to 18 in. ---\$1.00

(PYRACANTHA) FORMOSANA—This is the most showy of the red berried pyracantha, a solid mass of brilliant red berries with glossy green foliage. Pyracanthas will be severely pruned before shipping to facilitate transplanting.

(PYRACANTHA) LALANDII—This variety has golden yellow berries, an upright grower; berries commence to turn to their golden color in late August.

Prices on above Pyracanthas

Small \$.75 Medium \$1.00 Specimen \$2.00

PYRACANTHA, CRENULATA, ROGERSIANA:

This is a new addition to the pyracantha family, and will replace the older varieties, as this, berries very young, and the orange-red berries color up in the latter part of August and carry throughout the winter, semi-upright grower.

Each: Medium ---\$1.00 Heavy ---\$1.50

PLUMBAGO CAPENSIS: A very beautiful evergreen shrub producing an abundance of pale blue flowers.

Each ---\$.50

PODOCARPUS (Japanese Yew)—Long dark green leaves three inches long. Pyramidal habit of growth, can be pruned to any desired shape, does well in full sun or dense shade.

12-18 in. ---\$.75 18-24 in. ---\$1.15 2-3 ft. ---\$1.50

3 to 4 ft. ---\$2.00 4 to 5 ft. ---\$2.50

PHONTINA GLABRA—Photinia is a mass of burning scarlet when covered with new growth. This, mixed with the green of the old leaves, makes it a plant you will surely be convinced is a wonderful addition to the evergreen family. Can be sheared into any form; suitable for hedges, individual planting as well as mixed setting among other green leaved evergreens.

18 to 12 in. ---\$.35 12 to 18 in. ---\$.60

18 to 24 in. ---.90 24 to 36 in. ---1.25

PHOTINIA SERRULATA—Larger leaf, stronger grower than Photinia Glabra. Leaves are separated, and new growth wine color.

2 to 3 ft. ---\$1.25 3 to 4 ft. ---\$1.50

Conifers

CUNNINGHAM LANCEOLATA GLAUCA: (Blue Chinese Fir): The foliage is more dense and glaucous than on the old cunninghamia fir, this plant will take an important position in the Southern landscape scene where you want a plant with blue shading to it.

18 to 24 in. ---\$1.00 24 to 36 in. ---\$1.50 3 to 4 ft. ---\$3.00

Broad Leaf Evergreens

ARDISIA CRENULATA — Compact, evergreen shrub with thick, dark green foliage, and bright red berries in winter. Resembles American Holly but is very dwarf in habit of growth. Excellent for shady places and also as a pot plant for Christmas.

Small size ---\$.50 Medium ---\$.75 Large ---\$1.50

ABELIA GRANDIFLORA—One of our most beautiful and satisfactory broad-leaved evergreens, fine for foundation plantings, hedges and single specimen plants.

12-18 in. ----- each \$.35

3-4 ft. ----- \$.75 4-5 ft. ----- \$1.00

BOTTLE BRUSH (*Callistemon Rigidus*)—The evergreen foliage is narrow and dark green, on the new growth it produces long cylindrical brush-like flower spikes which gives it the name of Bottle Brush. Can be made to bloom all summer if after blooming it is pruned severely.

From pots ----- 50c and 75c

BUXUS—*Suffuticosa*, Old English box, small, dark green foliage, slow grower, suitable for hedges, pots and urns.

BUXUS—*Sempervirens*, Bush Box Japonica, round light green foliage, fast grower.

Climbing, American Beauty, red.

Climbing Mary Wallace, pink.

Climbing Talisman, golden yellow.

Climbing Marechal Neil, yellow.

Priced: Each ---\$.30 Twelve for ---\$3.00 Prepaid.

HINTS ON ROSE CULTURE

Roses do best in a stiff soil, not too light. Add clay where you have too sandy soil. A good mixture of peat moss, well rotted cow manure, and bone meal is beneficial. Roses are heavy feeders and should be well fertilized and watered.

There are two diseases and one pest that give most of the trouble here in the South. (1) Mildew: May be controlled by dusting with Dusting Sulphur. (2) Black Spot: A fungus growth which causes black spots on the leaves and causes them to turn yellow and fall off. Spray with Bordeaux Mixture every 10 days or two weeks. (3) Thrips: An insect which feeds on the blooms and leaves. Can be controlled by using nicotine sulphate at the rate of 1 to 600 to your Bordeaux spray.

ROSE ROULETTE—Very dwarf form of rose, never grows over ten inches high, small double pink flower. Novelty for pot or rock garden.

Each -----\$.30 Six for -----\$1.50

Fruits

PEACHES—Early Elberta, Belle Georgia and Hiley Belle. 25c.
